The Kmart “Standardised” Carton Label

The concept of a common “standardised” carton label format was developed to assist in removing the inefficiencies and cost that Suppliers and Manufacturers incur in meeting our individual requirements.

The label is based on a “real estate” principle. Every data element that could be required has been given its own specific location. If Kmart does not use a particular data element, then that space is left vacant. The label MUST NOT be re-formatted because some data elements are absent. The format of the label must always remain constant.

There are three types of data elements included in the label:

Mandatory	Must always appear on the label
Conditional	Must always appear on the label when a certain condition is met
Optional	

Use of the Serial Shipping Container Code (SSCC) or Ai (00)

The label does include the use of the UCC/EAN Serial Shipping Container Code (SSCC). However the inclusion of the SSCC by a supplier will only be accepted after the Suppliers in-house processes have been fully accredited by Kmart Australia Limited. Suppliers who are reviewing their labelling systems in response to this document need to be aware that the later accreditation process only allows for the use of labeling equipment that is part of an accredited hardware and software solution.

A “standardised” Kmart format for UCC/EAN 128 pallet and shipment labels has also been developed and can be downloaded from the Electronic Team’s web site <http://et.supplier.kmart.com.au>.

Additional Label Field Information

Alpha / Numeric Data

FROM : Suppliers Name

: The name of the supplier who received the purchase order

TO : Ship To Location

: The delivery location as specified in the order. This can be a Distribution Centre or a store.

SSCC Number

: Is Mandatory where the Supplier is accredited by Kmart.

Order Type Indicator

: Order Type Indicator is mandatory based on receipt in the EDI message.

The indicators that can be used are, Advert Date – AD DDMM, New Line – NL, Replenishment – RPL, Customer Order – CO, New Store – NS or Promotional Order PR. Kmart can use AD DDMM, NL & RPL.

Department Name / Number

: Is Mandatory, based on receipt of this information in the order

Item description

: Is conditional, based on the carton containing only 1 SKU

Carrier

: Carrier is optional. Suppliers, or their Carriers may want to use it

FOR : Business / Store

: The business & number of the store or Distribution Centre that the stock was ordered for

Purchase Order number

: Is Mandatory as passed in the Order

Barcoded Data

TO : Ship To Location

: as an Application Identifier (Ai) 421 including the ISO country code. Australia is 036

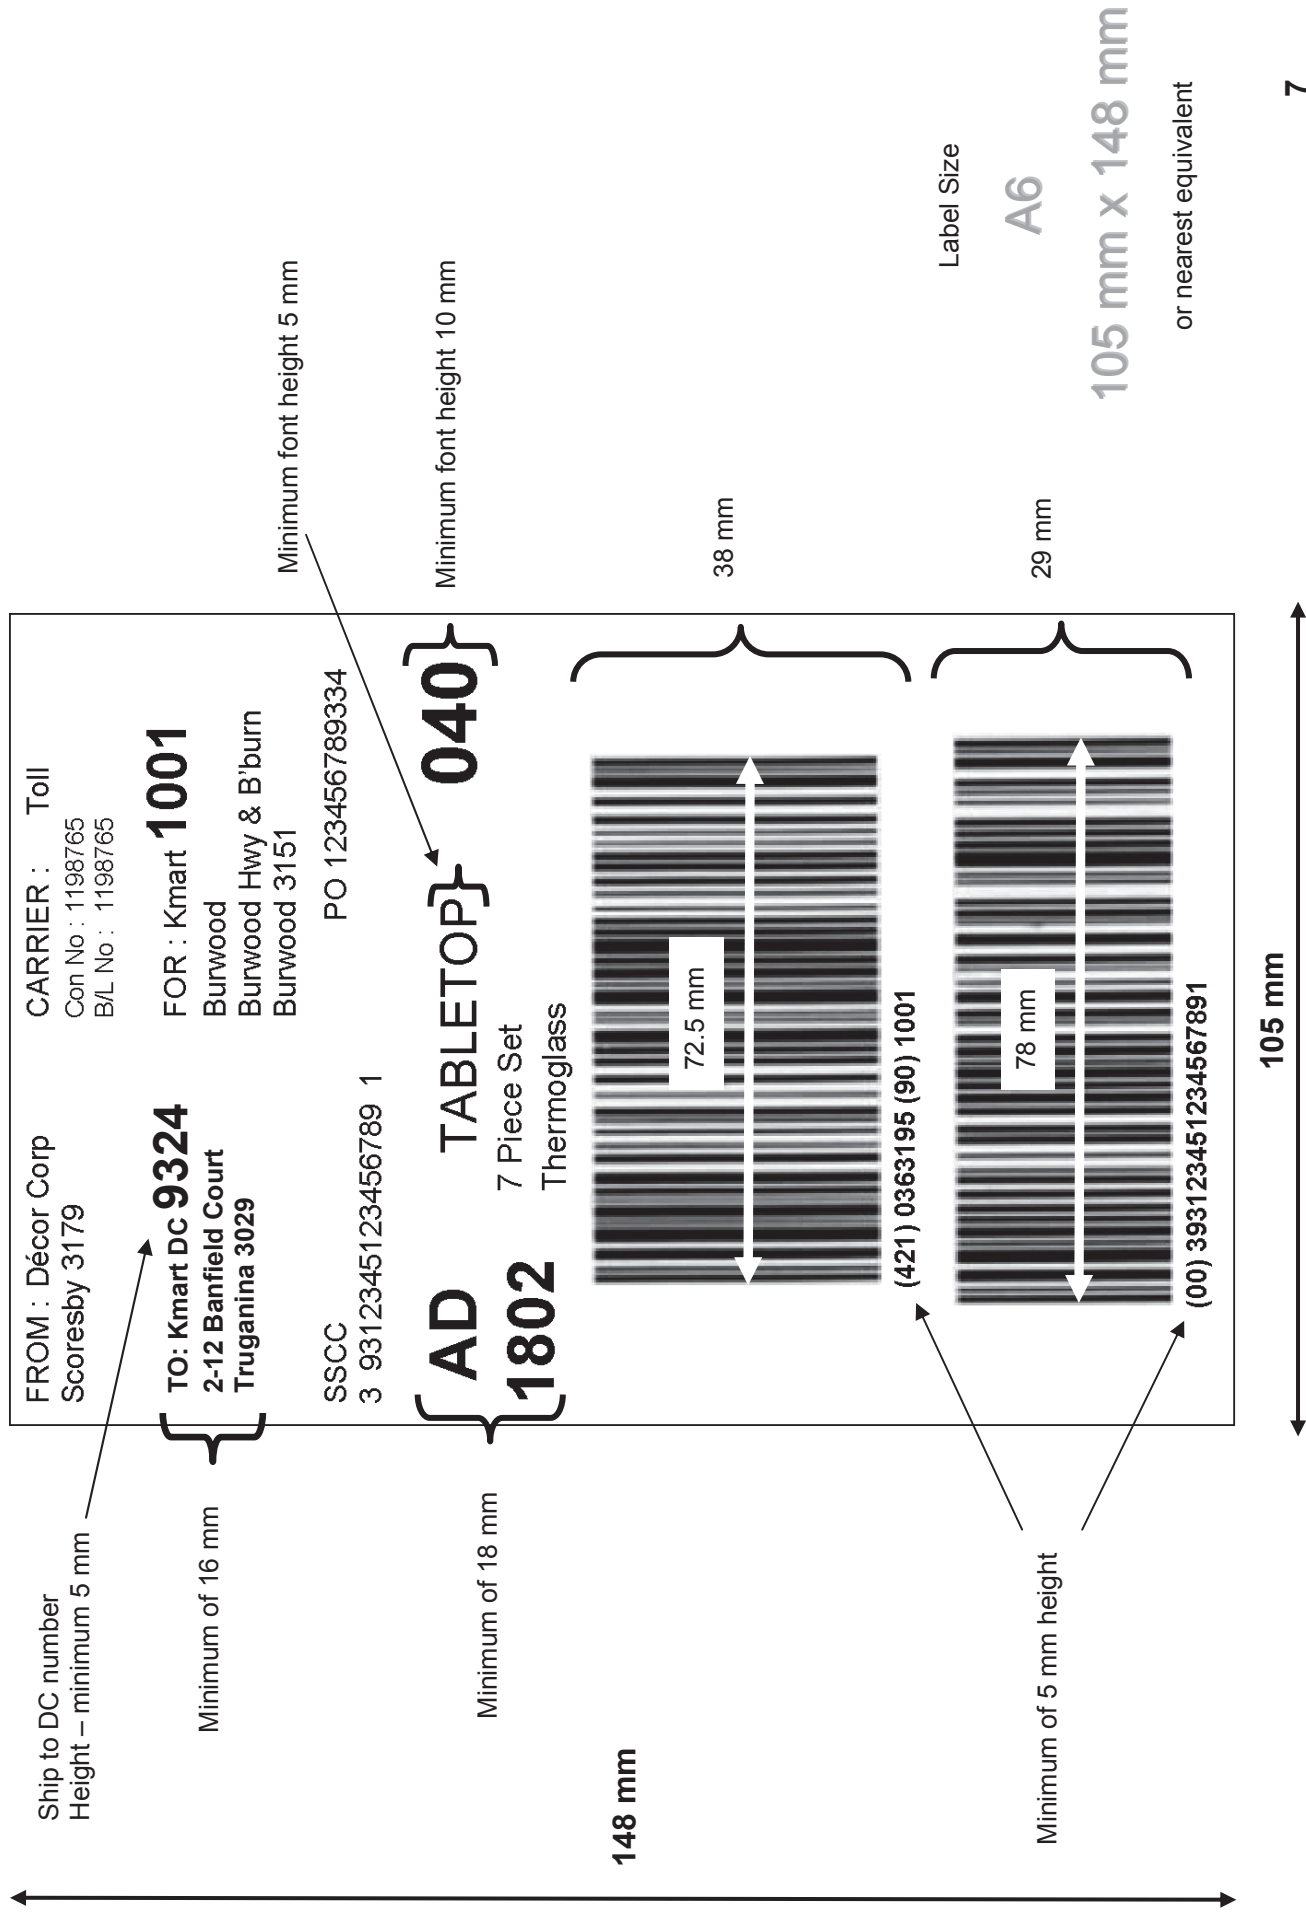

FOR : Store Number

: as an Application Identifier (Ai) 90. Must always be 4 digits. Zero fill if necessary eg store 004 to be shown as 0004.

SSCC Number

: as an Application Identifier (Ai) 00, is Mandatory on the Supplier being accredited by Kmart.

Technical Specifications

Bar Code Specification

Symbology:

UCC/EAN-128

Start Code:

Code Set C followed by a function 1 (FNC1) character

End Symbol:

The end of bar code symbol consists of a modulo 103 check character and a stop character

Concatenation:

For the concatenated “Ship To and For” Bar Code (Post Code and Store Number) a Function Code 1 (FNC1) character is required as a field separator before the second Ai indicator (90)

Magnification:

50%

Length:

Top Bar Code (Post Code and Store Number) – 72.5 mm
Bottom Bar Code (SSCC) – 78 mm

Width:

Top Bar Code (Post Code and Store Number) – 38 mm
Bottom Bar Code (SSCC) – 29 mm

Light Margin/Position:

The Bar Codes are to be positioned in the middle of the label with a minimum light margin of 5mm each side.

Miscellaneous:

Brackets and spaces are not to be put into the bar code

Label Positioning Specifications

The carton label must be placed on one of the longest sides of each carton.

The right hand end of the SSCC barcode must be no less than 19mm from the vertical edge of the carton. The bottom of the SSCC barcode must be no less than 32mm from the base of the carton, in keeping with EAN guidelines for carton label positioning.

Note, where the label height is greater than the carton height discuss the label positioning with the Electronic Trading Team.
